ABOUT ME

With over 5 years of experience building scalable, high-quality React applications. Skilled in Extreme Programming (XP), Test-Driven Development (TDD), Lean methodologies, and feature flag-driven development, with strong expertise in Domain-Driven Design (DDD).

LANGUAGES

Spanish: Native

English: TOEIC certified (UPM) and 2 years of professional experience in an international Belgian company with 100% English communication.

EXPERIENCE

Senior Frontend Eng | Mercadona Tech

Nov. 2024 | Current

Currently working as a Frontend Engineer, responsible for the frontend development of one of the company's core business verticals focused on sales planning, primarily using **React**. I work within a highly disciplined engineering environment following **Extreme Programming (XP)** principles, **Test-Driven Development (TDD)**, and **Lean** methodologies.

Alten Delivery Center

Dec. 2021 | Nov. 2024

Senior Frontend Engineer – Inditex | Dec 2023 – Nov 2024

Frontend-focused role working mainly with **React** on one of the group's most innovative and business-critical verticals. Involved in frontend architecture, task definition, and ensuring high code quality, performance, and maintainability.

Full Stack Developer – Macq | Dec 2021 – Dec 2023

Worked on Smart Cities and traffic mobility solutions using **React**, **Angular**, and **Scala**, contributing to the development of large-scale systems for optimizing traffic management in Belgium.

FullStack Dev | Zalcu

Jan. 2021 | Dec. 2021

Developed and delivered multiple projects using React and Node.js, working across frontend and backend, with experience in SQL/MongoDB databases and cloud deployments on AWS.

EDUCATION

2021 Software Eng.

Universidad Politécnica de Madrid

2017 Web Application Development

IES El Lago
